What is the product?

Type

The product is a common investment fund established under section 96 of The Charities Act 2011.

Objectives

The product aims to achieve a positive total annual return, regardless of the prevailing market conditions. The product's two principal objectives are

- to preserve the product's capital over a rolling 12 month period and
- to grow the value of the product by delivering consistent positive returns (through a combination of capital and income) greater than the return on cash (as defined by the Bank of England Bank Rate).

The product invests directly in an actively managed portfolio of different asset classes, including shares issued by global companies, government and corporate debt (bonds) and commodities. The product may also invest in other conventional assets from time to time, such as convertible bonds (bonds that may be exchanged for shares) and preference shares (shares which receive a fixed dividend before common shares).

The product may invest in other funds in order to gain exposure to other asset classes, to capture manager skill or to provide additional diversification.

The product may use derivatives for efficient portfolio management purposes only, for example to attempt to offset potential losses that may be incurred by other investments made. The product's exposure to currencies other than sterling (£) shall be hedged back to sterling using forward foreign exchange contracts (FFX) when appropriate to do so, since

this is the base currency of the UK charities investing in the product.

The product may hold cash, and the proportion of the product that this represents will depend on market conditions and requirements for subscriptions and redemptions.

The product adopts ethical investment policy restrictions limiting investment in the following sectors: alcohol, armaments, gambling, pornography, and tobacco.

The return achieved by the product will be the performance of the assets that the Fund invests in after deducting the costs, expenses and fees of running the product.

The product aims to distribute available income every quarter.

The product has no fixed maturity date and cannot be terminated unilaterally by Ruffer.

Intended retail investor

The product is targeted at charities registered with the Charity Commission for England and Wales, the Office of the Scottish Charity Regulator and/or Inland Revenue Charities, Bootle, Merseyside (including charities established in Northern Ireland), or exempt from registration with the Charity Commission by virtue of the Charities Act 1993 (as amended).

The investor's objective for this investment should be aligned with that of the product as outlined above.

The investor should have at least a basic knowledge of and understand the risk of investing in funds, could be a first time investor, and have an investment horizon of greater than five years. The investor should also have the ability to bear loss and understand that the investment, in an extreme case, could go to zero.

What are the risks and what could I get in return?

Risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for at least five years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 3 out of 7, which is a medium-low risk class.

This rates potential losses from a future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the product is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Single investment paid. Investment £10,000

Scenario		1 year	3 years	5 years
Stress scenario	What might you get back after costs £	7,794	7,948	7,433
	Average return each year %	-22.06	-7.37	-5.76
Unfavourable scenario	What might you get back after costs £	9,747	10,380	11,243
	Average return each year %	-2.53	1.25	2.37
Moderate scenario	What might you get back after costs £	10,498	11,804	13,272
	Average return each year %	4.98	5.68	5.82
Favourable scenario	What might you get back after costs £	11,305	13,421	15,665
	Average return each year %	13.05	10.30	9.39

This table shows the money you could get back over the next five years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenarios show what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Issuer is unable to pay out?

The product is not protected by the UK's Financial Services Compensation Scheme or any other investor compensation or guarantee scheme. This means that if the product is unable to pay out, you may lose all of your investment. Any pay-out you receive will be paid by the product itself and not Ruffer, however a default by Ruffer may also put your investment at risk.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. The figures assume you invest £10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time

Investment £10,000

If you cash in after	1 year	3 years	5 years
Total costs £	256	631	1,107
Impact on return (RIY) per year %	2.56	1.85	1.71

Composition of costs

The table below shows

- 1 The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- 2 The meaning of the different cost categories.

This table shows the impact on return per year

Cost	%	Impact
One-off costs	Entry costs	1.00 The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	Exit costs	na The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.21 The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1.28 The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	na The impact of the performance fee. We take these from your investment if the product outperforms its benchmark.
	Carried interests	na The impact of carried interests. We take these when the investment has performed better than a certain percentage.

How long should I hold it and can I take my money out early?

Recommended holding period: five years

The recommended holding period has been set at five years because the product's objective is to provide a positive annual return over the medium term. Performance may be more volatile over shorter periods. There are opportunities to redeem units in the product on a weekly basis and redemption requests should be made in accordance with the instructions in the Scheme Particulars. There are no fees or penalties charged by the product or the issuer for cashing out prior to the end of the recommended holding period although in some circumstances a dilution levy could be applied.

How can I complain?

In the event that you are dissatisfied with any aspect of the product and/or the Issuer's performance, please write to our Compliance Officer. Complaints should be sent, for the attention of the Compliance Officer, to 80 Victoria Street, London SW1E 5JL or via email to compliance@ruffer.co.uk. If you have a complaint about the firm who has advised you regarding the product or the firm who sold you the product, complaints should be directed to that firm.

Other relevant information

For any further information on the product, please contact Ruffer on +44 (0)20 7963 8100 or you may refer to www.ruffer.co.uk, where you can find the most recent scheme and scheme particulars, annual and interim report and accounts and other details and updates on the product. This key information document is updated at least every twelve months.
