

Ruffer Total Return International

Positive returns with low volatility

During January the share price fell by 1.8%. This compared with a fall of 3.1% in the FTSE All-Share Index and a rise of 3.6% in the FTSE Government All-Stocks Index (both figures total returns in sterling).

January proved to be yet another torrid month for risk assets as global equity markets suffered their worst start to the year since 2009. Many of the fears that troubled investors in the latter half of 2015 continued to weigh heavily on asset prices. Oil prices fell yet further; the Brent price was down 7% having already fallen 69% since the end of 2013. The ongoing weakness and volatility of the renminbi have been perceived as evidence of a further slowdown in China. The 23% fall in Chinese equities provided another illustration of these worries. Elsewhere, rising concerns of a potential recession in the US ensured a difficult environment for investors. Last year we reduced our equity exposure to its lowest level since the financial crisis. While this helped and inflation linked bonds and gold investments provided positive returns during the month, it was not sufficient to offset the losses in our remaining equity positions.

The second half of January was punctuated by a further round of plate spinning from the world's major central bankers. Mario Draghi provided some respite to embattled markets by indicating that the European Central Bank (ECB) stood ready to inject fresh stimulus, should it be required. Mr Draghi was then trumped by Haruhiko Kuroda (Governor of the Bank of Japan); despite having ruled out the possibility only eight days earlier Mr Kuroda and the Bank of Japan became the latest major central bank to introduce negative rates, following in the footsteps of Switzerland, Denmark, Sweden and the ECB. These actions highlight the growing disparity between the US and the other major economies around the world. Despite providing investors with soothing tones, the Federal Reserve still appears to be intent on raising rates four times in 2016. Market expectations are less optimistic. The Federal Reserve will have to decide whether it wants to continue tightening policy for reasons of financial stability or defer hikes until growth (and inflation) show themselves fully. This highlights the dilemma the authorities face; not only are their efforts to normalise monetary policy potentially being overcome by deflationary forces, but there is little left in the conventional central banker's tool kit to respond to further shocks. This suggests that yet more radical measures may be required. Anyone for fiscal stimulus? The actions of the Bank of Japan and the words from the ECB may allow some of the more acute stresses to abate in the short term. However, we are likely to see continued tension between the deflationary impulses and the upward pressure on asset prices from zero (and lower) interest rates resulting in further episodes of whiplash in equity markets.

We re-introduced a holding in Japanese property developer Mitsui Fudosan whose share price had fallen back to levels not seen since the launch of 'Abenomics'. The shares now trade at a significant discount to net asset value and should benefit from the growing disparity between rental yields and Japanese government bond yields; following the action of the Bank of Japan government bond yields now trade at a negative yield for maturities out to nine years. It is also likely that rents will continue to rise as the domestic economy improves.

Please note that Ruffer SICAV is a Luxembourg UCITS and subject to Luxembourg law. Ruffer SICAV is authorised by and subject to the supervisory authority in Luxembourg, the CSSF, and is a scheme recognised by the UK's Financial Conduct Authority (FCA). Ruffer Total Return International (RTRI) is not registered for distribution in any country other than Belgium, Finland, France, Germany, Ireland, Italy (qualified investors only), Luxembourg, the Netherlands, Singapore (institutional and accredited investors only), Spain, Sweden, Switzerland (qualified investors only) and the UK. The fund's prospectus is provided in English; Key Investor Information Documents are provided in Dutch, English, French, German, Italian, Spanish and Swedish and are available on request or from www.ruffer.co.uk. Ruffer LLP is not able to market RTRI in other countries, except under certain exemptions. In line with the Prospectus, it is possible that at any one time Ruffer Total Return International may invest more than 35% of its assets in transferable securities issued or guaranteed by an EEA state, one or more local authorities, a third country or a public international body to which one or more EEA States belong. The only aforementioned securities where Ruffer would currently consider holding more than 35% would be UK or US government issued transferable securities.

C class January 2016 Issue 55

Investment objective

The investment objective of Ruffer Total Return International ('the fund') is to achieve positive returns with low volatility from an actively managed portfolio. The fund may have exposure to the following asset classes: cash, debt securities of any type (including government and corporate debt), equities and equity related securities and commodities (including precious metals). Pervading this objective is a fundamental philosophy of capital preservation.
