

Ruffer Total Return International

Positive returns with low volatility

O class April 2016 Issue 58

During April the fund price rose by 0.03%. This compared with a rise of 1.1% in the FTSE All-Share Index and a decline of 1.2% in the FTSE All-Stocks Index (both figures total returns in sterling).

We have previously remarked, only partly in jest, that in a world where zero interest rates (or even lower) are the norm, eventually the return on other financial assets might turn out to be zero too. Which may explain why so many previously successful hedge funds have now thrown in the towel. So far stock markets appear to be doing their best to adhere to this rather depressing roadmap. After the sharp falls seen across equities earlier this year, aided by either soothing words or inaction from central banks, most markets have made their way back to par, but show little enthusiasm for further gains.

Tempting as it is to declare premature vindication of the zero return hypothesis, a more likely explanation lies in investors' uncertainty as to whether we face the perceived failure or normalisation of monetary policy. Unfortunately neither path appears particularly attractive for stock markets. If global growth is strong enough to bear higher interest rates (initially in the US) then dollar strength and rising discount rates may undermine any short term progress. Whilst if monetary policy is seen to have failed, the progression to the likely next step, fiscal intervention, is fraught with dangers against which, in our view, only inflation-linked bonds stand sentry.

As we write, such issues appear to be playing out most clearly in Japan, where Bank of Japan Governor Kuroda must feel he is 'damned if you do, damned if you don't' whichever way he turns. His imposition of negative interest rates earlier this year received a resounding thumbs down from so in response he sat on his hands in April, only to find his inaction greeted by the same negative response. However, we believe the Japan story is still taking shape, and such missteps as we have seen recently will merely hasten the path to more reflationary fiscal intervention. This could perhaps come as soon as the G7 meeting hosted in Tokyo at the end of May and could be the catalyst for a recovery in a market that is both attractively valued and now shunned by overseas investors. So for now we are keeping our exposure to Japan largely intact, relieved that any setbacks there have so far been offset by gains in our index-linked bonds and gold holdings (which we added to earlier in the year).

Meanwhile, it would be remiss of us not to pass some comment on the political events playing out. We note that not only are zero interest rates far from a universal panacea for financial markets, but western electorates also seem remarkably resistant to their curative powers. People everywhere are disillusioned with politicians and policies that reflect this mood. Such a move towards populism normally brings with it some unwelcome outcomes, but it also points towards a world less willing to rely on the benevolence of central banks and focused more on the direct intervention of elected governments in striving for either growth or inflation.

Please note that Ruffer SICAV is a Luxembourg UCITS and subject to Luxembourg law. Ruffer SICAV is authorised by and subject to the supervisory authority in Luxembourg, the CSSF, and is a scheme recognised by the UK's Financial Conduct Authority (FCA). Ruffer Total Return International (RTRI) is not registered for distribution in any country other than Belgium, Finland, France, Germany, Ireland, Italy (qualified investors only), Luxembourg, the Netherlands, Portugal, Singapore (institutional and accredited investors only), Spain, Sweden, Switzerland (qualified investors only) and the UK. The fund's prospectus is provided in English; Key Investor Information Documents are provided in Dutch, English, French, German, Italian, Portuguese, Spanish and Swedish and are available on request or from www.ruffer.co.uk. Ruffer LLP is not able to market RTRI in other countries, except under certain exemptions. In line with the Prospectus, it is possible that at any one time Ruffer Total Return International may invest more than 35% of its assets in transferable securities issued or guaranteed by an EEA state, one or more local authorities, a third country or a public international body to which one or more EEA States belong. The only aforementioned securities where Ruffer would currently consider holding more than 35% would be UK or US government issued transferable securities.

Investment objective

The investment objective of Ruffer Total Return International ('the fund') is to achieve positive returns with low volatility from an actively managed portfolio. The fund may have exposure to the following asset classes: cash, debt securities of any type (including government and corporate debt), equities and equity related securities and commodities (including precious metals). Pervading this objective is a fundamental philosophy of capital preservation.
